EXPERIMENT-3

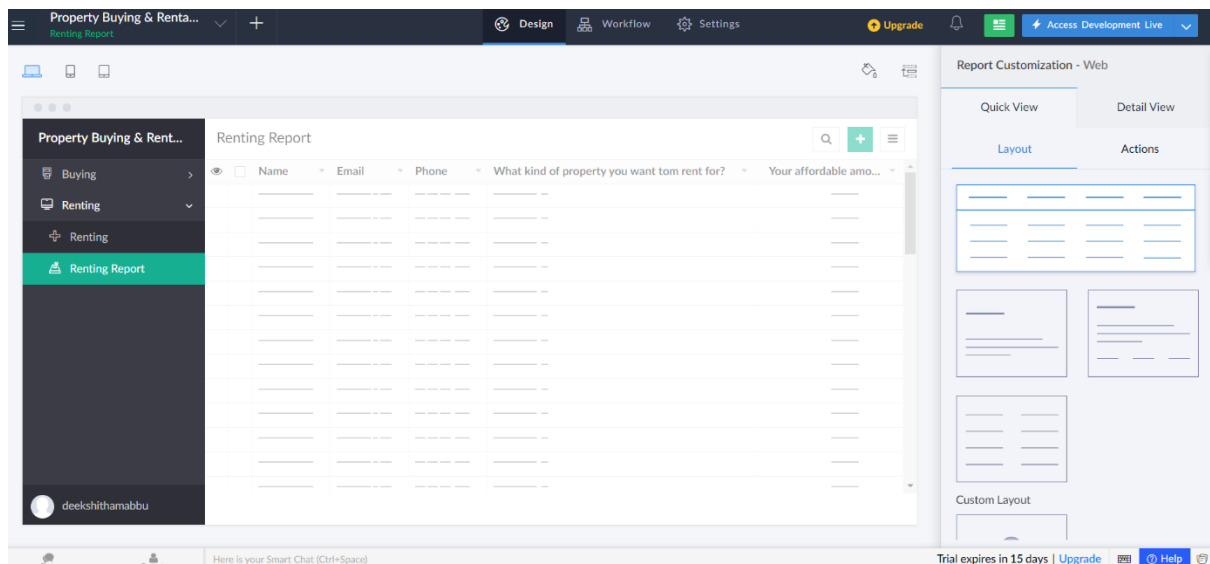

Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS

STEPS:

The screenshot shows a web application interface for "Property Buying & Rental process". The top navigation bar includes "Design", "Workflow", "Settings", "Upgrade", and "Access Development Live". The left sidebar shows a menu with "Buying", "Buying Report", and "Renting". The main content area displays a "Buying" form with fields for Name (First Name, Last Name), Email, Phone (+91 81234 56789), Address (Address Line 1, Address Line 2), City / District, State / Province, Postal Code, and Country. The right sidebar shows "Form Customization - Web" with "Label placement" options.

The screenshot shows the "Field Properties" configuration for the "Buying" form. The "Basic Fields" panel on the left lists fields: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The "Field Properties" panel on the right shows the configuration for the "Name" field. The "Field name" is "Name", the "Field link name" is "Name", and the "Validation" is set to "Mandatory". The "Display Fields" section shows "First Name" and "Last Name" are selected, while "Prefix" and "Suffix" are not.

RESULT:

Hence, the property buying and renting process system application is successfully completed using zoho.com
